Abstract (en)  
[origin: WO2012072949A1] The present invention relates to an athletic shoe having cleats, comprising an upper and an outsole (1), wherein said sole (1) has a front portion (2) capable of receiving the front of the foot, a central portion (8) capable of receiving the middle of the foot, and a rear portion (3) capable of receiving the heel. Said shoe is characterized in that said rear portion (3) of said outsole (1) consists of a hollow shell (4) and a heel seat (33), said heel seat being removably arranged in a recess formed by said hollow shell (4), and in that said rear portion (3) has a portion that is thickened relative to said front portion (2), said thickened portion being adjustable by modifying the thickness of said removable heel seat (33).
