Abstract (en)

[origin: WO2012072924A1] The present invention relates to a flexible bag (1) for biopharmaceutical use, including a shell (3) capable of receiving, in the inner space (3a) thereof, a flowable biopharmaceutical product in the general state of a liquid or paste, and comprising flexible walls joined by fixed and sealed rigid-connection areas (4), two opposite walls (5 and 6) of which are connected to each other by the peripheries (7) thereof, at least one inlet port (9) and at least one outlet port (10), a port (9, 10) being combined with a passage of the shell (3) and mounted on said shell by fixed and sealed connection means (15), a plurality n of similar outlet ports (10) suitable for discharging the biopharmaceutical product received in the inner space (3a) and grouped together in a tapping area (12), a tapping wall (5) provided with at least one opening (14) for the passage and mounting of the outlet port (10) for the n similar outlet ports (10), fixed and sealed port-shell (3) connection means (15) which are rigidly, fixedly, and sealingly connected to the tapping wall (5) around the at least one opening (14) for the passage and mounting of the outlet port (10), and an area (8) for folding the two opposite walls (5 and 6).
