Abstract (en)

[origin: WO2012139928A1] Device for making available wheel parameters of a rail vehicle (1) for a train computer (2) of the rail vehicle (1) having at least one measuring device (7) which measures the wheels of the rail vehicle (1) rolling on rail tracks (3) in order to determine the wheel parameter of the rail vehicle (1) and transmits the determined wheel parameters to a transmitting device (9) which transmits the wheel parameters to a receiver device (10) of the rail vehicle (1), which receiver device (10) passes on the received wheel parameters to the train computer (2) of the rail vehicle (1).
