Abstract (en)
[origin: GB2485911A] A package 10 of thermal and/or acoustic insulation material 11 has a carrying handle 13 secured to its enveloping film 12. The carrying handle comprises a handle film having at least one incision which separates an attachment portion of the handle film which is secured to a portion of the surface of the enveloping film from an integral grip portion 15 of the handle film which is configured to allow a user's hand to be inserted between the grip portion and the enveloping film to grip the package. The package may include first and second axially aligned rolls and envelope may include a circumferential weakness at a position corresponding to a central position (fig 8). A method of securing a handle to a package may involve providing the carrying handles on a continuous roll.
