Abstract (en)

[origin: WO2012074404A2] The invention relates to a method and device for drilling a pit or passage extending substantially vertically into the ground, and a flexible hose therefor. The method according to the invention comprises of: providing a frame with a pressure chamber; arranging a first outer end of a flexible tube on the pressure chamber using connecting means; - applying a pressure in the pressure chamber with a pressure medium by means of pressure means; and carrying the flexible tube into the ground.
