Abstract (en)  
[origin: WO2012072786A2] The invention relates to a chisel holder for a soil treatment machine, especially a road miller, comprising a support base to which an add-on is connected indirectly or directly on an add-on side, the support base having two first and/or two second stripping surfaces that are at angles relative each other, the supporting base having a treatment side with a chisel seat. In order to design a stable and rigid chisel holder, the first and/or second stripping surfaces diverge from the add-on side towards the treatment side.
