Abstract (en)

[origin: EP2647556A1] The invention relates to a tiller arm truck (10) designed so that the tiller arm (20) can be set in a first neutral steering position (20a) and in a second neutral steering position (20b), which differs with an angle \pm being less than 90° from each other. The invention also relates to a method for improving the ergonomics of a tiller arm truck (10), wherein the tiller arm (20) is set in a neutral steering position (20b) differing with an angle \pm being less than 90° from the longitudinal direction (80) of the truck.
