Abstract (en)
[origin: EP2647591A1] The industrial truck (1) has a display (12) that is connected with a control unit (10). The control unit determines whether the shelf is loaded or unloaded, and determines the maximum permissible load-carrying capacities of the shelf and truck. The minimum of the maximum permissible load-carrying capacities of the shelf and truck is determined by the control unit, and the minimum of the maximum allowable capacity of the truck depending on the maximum shelf capacity is displayed by the display placed in the field of view of the operator.
