Abstract (en)
[origin: EP2647783A1] The device has a door provided with a blade and extending horizontally over 50 percent of width of the blade extending in a base section (12). The base section is connected to a pressure profile (14) through a gear mechanism, so that the gear mechanism is activated and operated over a panic lock when operating the pressure profile. A mounting profile i.e. cable duct, is provided between the base section and the blade. The mounting profile includes a hollow profile (18), and is mounted at the blade over the base section.
