Abstract (en)

The present invention relates to an end closure member of a radiator, comprising a side trim member (3) and a cap (1), the cap (1) having a first end for being coupled to a radiator member (2) and a second end for being coupled to the side trim member (3), said second end of the cap (1) being coupled in a specific housing (4) in said side trim member (3). The present invention therefore provides a reliable, safe and aesthetic securing of a side trim member with a radiator member by means of a cap, said cap being concealed by the side member once the assembly is put together.
