Abstract (en)  
[origin: WO2012076495A1] The invention relates to an assembly of two parts crimped one over the other by folding at least one portion of peripheral edge (12) of one part referred to as the first part (8) over the other part referred to as the second part (9). Said first part (8) has a hinge-forming zone that facilitates the folding of said portion of peripheral edge (12). The invention also relates to a collector comprising said assembly and to a heat exchanger comprising said collector.
