Abstract (en)

[origin: WO2012078969A1] Disclosed is a lens blocking composition and lens blocks as well as methods of blocking and processing a lens. In particular, a thermoplastic lens blocking composition for blocking an optical substrate in a processing position is disclosed that comprises a blend of a homopolymer or copolymer of epsilon-caprolactone having a number average molecular weight greater than 4,000 and a resin based on a bisphenol or a bisphenol-derivative. The composition is solid at 25 degrees Celcius and 1 atm.
