Abstract (en)
[origin: WO2012095194A1] The present invention relates to a device for supporting a pair of windshield wipers (12, 26), each of which is provided with a structural element and a wiper blade (16, 30), the supporting device (10, 101, 102, 103, 104, 105, 200, 201) comprising a first and a second recess (14, 28), each of which is provided with means for retaining the respective structural elements of the two wipers (12, 26), characterized in that the recesses (14, 28) have an opening leading onto a single side of a supporting plane (P) in order to enable the insertion of the pair of wipers (12, 26) into the respective recesses (14, 28) from a single side of the supporting plane (P). The present invention also relates to a supporting assembly comprising a plurality of supporting devices, as well as to corresponding packaging and to a corresponding assembly method.
