Abstract (en)  
[origin: WO2012075996A1] The invention relates to a U-section (22) with two limbs (24, 26). The base region (20) of a panel, such as especially the glass panel (18) of a railing, to be arranged on a structure (48), can be fixed between said two limbs. Said U-section (22) is characterised in that it is made of two parts. The first limb (24) of the U-section (22) can be fixed to the structure while the other second limb (26) of the U-section (22) can be applied to the first limb (24) of the U-section (22) in a stable manner.
