Abstract (en)

[origin: WO2012083942A1] The invention relates to an armoring element for protection against ballistic threats, comprising a mounting element (2), which is welded on by means of a weld connection (3), for securing an object to the armoring element (1), wherein a cover element (4) covering the weld connection (3) as ballistic support is provided. The invention further relates to a ballistically protected housing, in particular a vehicle housing, comprising an armoring element (1) having a mounting element (2), which is welded on by means of a weld connection (3), for securing an object to the armoring element (1), wherein the armoring element (1) is designed in the manner described above.
