Abstract (en)
Forklift truck 1,1', comprising power consuming units to be supplied from an energy source, comprising a holding device 2 provided with compartments 3 for receiving at least two battery elements 10 for providing said energy source, wherein said holding device 2 is adapted such that a received battery element 10 can power said forklift truck 1, 1' on its own, wherein the said holding device 2 is arranged to receive a battery element 10 in a horizontal arrangement such that the applied weight of a received battery is essentially on the centre of a longitudinal symmetry axis 30 of the forklift truck 1,1'. The invention also relates to a battery element 10 and a weight (20).
