Abstract (en)  
[origin: EP2650436A2] The ski-jump setup (10) has a pair of ski tracks (14) extending side by side, which are determined by sliding surface elements (12). The ski tracks are formed in area of the jump table of the sliding surface elements. The sliding surface elements are provided independent of each other and are movably limited. The sliding surface elements have pressure measuring elements (16) which are spaced from each other in longitudinal direction of the sliding surface elements.
