Abstract (en)

The arrangement i.e. non-limiting skylight, has a guide unit (4) slidably mounted in a guide frame in a displacement direction. A window pane (2) has sliding window frames, where each frame is composed of frame profiles (1b, 1a) that are made of glass-fiber reinforced plastic. The profiles are partially formed as hollow sections, which exhibit hollow chambers partially filled with a filling material (6) i.e. foam material. The guide unit is designed as a linear guide formed of a guide rail and a guide carriage. Sealing elements (5a, 5b) i.e. brushes, are provided inside the guide frame.
