Abstract (en)
[origin: EP2650601A1] The arrangement has a housing (1), in which a lamp insert is arranged. The lamp insert is provided with a lighting unit (3) i.e. LED, to be equipped for connecting and necessary operation of electrical/electronic components. A light transparent cover (6) is adjustably attached at the housing in two different positions and associated to a light exit region. A latching element (7) is provided on the light transparent cover, which cooperates with a latching unit (9) at the housing. One of end regions of the light transparent cover is closed with a single-piece formed forehead cap (11).
