Abstract (en)

[origin: EP2650865A2] The arrangement has LEDs arranged on a LED-printed circuit board (PCB) at a narrow side, which forms a light coupling region of a planar light guide element. The light guide element radiates light, which is delivered from the LEDs and irradiated over the light coupling region, over flat sides. The flat sides are arranged perpendicular to the narrow side. The LED-PCB is fixed at the light guide element by a clamping element (20). The clamping element is designed in a C-shape, and includes two side arms (21) for clamping with the light guide element.
