Abstract (en)

[origin: EP2650867A2] The lamp has a front transparent light output plate (2) which is arranged parallel to a rear transparent light output plate. An interstice is formed between the front light output plate and rear light output plate. Several LEDs are provided for irradiating light to the interstice. A reflector element arranged with reference to the interstice, is provided opposite to the LED. The size of the lamp can be reduced and the assembly property of the lamp can be improved.
