Abstract (en)  
[origin: WO2012079568A2] The invention relates to a support bar for disabled persons, in particular for use in sanitary modules. The invention is characterized in that a swivel joint (15), which can be moved between two end positions and which has a curved guide (30) extending over 90 degrees and a stop (25/26) that determines the swiveled-out operative position, is used as a bearing for the support bar (10), which can be moved from the vertical resting position of the support bar to a horizontal operative position and vice versa, which swivel joint (15) is supported at a distance from a base plate between two support plates (18, 19) fastened to the base plate (23).
