Abstract (en)

[origin: WO2012080018A2] The invention relates to shampoos and/or hair-conditioning agents which contain, in a cosmetic carrier a) 0.1 - 60 wt.-% of at least one surfactant, selected from the group of anionic, amphoteric/zwitterionic, non-ionic and/or cationic surfactants, and b) 0.01 - 20 wt.-% of at least one compound of formula (I), wherein Y represents a cycloalkylene group having 5 - 7 C-atoms and the groups R1, R2 represent, independently from each other, a grouping (II) wherein R3 represents a hydrogen atom, a methyl- or an ethyl group, p represents a whole number from 0 - 5, R4 represents a hydrogen atom or a methyl group, and q represents a whole number from 0 - 5. All quantities are based on the total weight of the shampoo and/or hair-conditioning agents. Said claimed shampooing and/or hair-conditioning agents provides the thus treated hair with advantageous properties, in particular improved smoothness and an improved surface gloss.
