Abstract (en)

[origin: WO2012079865A2] The present invention relates to a method for producing light guide bodies and to the use thereof in lighting units, for example, for liquid crystal display screens or monitors. The present invention in particular relates to a method for producing light guide bodies that have a thickness of no more than 1 mm and contain at least 80 weight percent polymethyl methacrylate and no light-scattering components.
