Abstract (en)
[origin: DE102011010635B3] The arrangement (1) has a form core (3) arranged at a carrier (2) for gradual retaining of a semi-finished fiber material (4). A pressure element (5) is provided for previous positioning of the semi-finished fiber material. The carrier and the pressure element are formed with each other in a moving manner. An independent claim is also included for a method for transforming lamination of fiber semi-finished material.
