Abstract (en)

[origin: WO2012080477A1] A container (2) for consumer goods comprises an inner portion (6) and an outer portion (4) that are moveable relative to each other between a closed position and an open position. A first surface (12) on the inner portion (6) comprises a printed design element (50) comprising a sequence of differing images. A second surface (30) on the second portion (4) comprises a fine cut element (60) formed of one or more cut outs (62) having at least a portion with a cut width of between 0.01 mm and 3 mm. The movement of the fine cut element (60) over the printed design element (50) produces an optical animated effect.
