Abstract (en)
[origin: WO2012079991A1] The present invention relates to a logistics system for transferring a platform (30) in the transporting direction (A) thereof, to a vehicle (10) and/or for receiving a platform (30) from a vehicle (10). The logistics system has a transfer station (20) with at least one mount (24a, 24b) for the platform (30), in order for the platform (30) to be received from the vehicle (10), or transferred thereto, in the transporting direction (A). The mount (24a, 24b) has a first accommodating region (24a), which is intended to accommodate a first region of the platform (30), and a second accommodating region (24b), which is intended to accommodate a second region of the platform (30). The first region and the second region of the platform (30) are spaced apart in the transporting direction (A).
