Abstract (en)

[origin: WO2012080069A2] The invention relates to a washing machine or a dryer or the like, having a washing drum in a lye housing, wherein the washing drum is rotatably mounted in the lye housing, wherein the lye housing is suspended or guided, particularly on springs, relative to an outer housing of the washing machine, and wherein the washing machine comprises a first drive for rotating the drum relative to the lye housing, wherein an at least second drive (6, 6) is provided for a linear motion of the lye housing (3) and the drum (8) relative to the housing (1) of the washing machine (1).
