Abstract (en)

[origin: WO2012080640A1] The invention relates to a novel method for installing an assembly (10) for recovering hydrocarbons escaping from an underwater facility (21), including a first bottom assembly (25) including a rigid canopy having a large surface area, and a second top assembly (26) for raising fluids up to a surface facility (13). The steps of towing the fluid-raising top assembly are carried out concurrently during the installation of the fluid-raising top assembly (26).
