Abstract (en)

[origin: WO2012080154A1] The invention relates to an operating device for a household appliance (1) having an electronic display panel (11) and an operating element (13) that can be displaced relative to the display panel (11) for setting operating conditions of the household appliance (1), wherein the operating element (13) is disposed at least in regions within the surface (12) of the display panel (11). The invention further relates to a baking oven (1) having an operating device (10).
