Abstract (en)
[origin: WO2012079811A1] The invention relates to a method for determining a range of a vehicle (10), wherein the vehicle (10) has an electric motor (14) for providing drive power and/or for recovering braking energy, wherein a weight of the vehicle (10) is determined on the basis of an acceleration and/or recuperation behaviour depending on a torque t and/or a rotation speed (n) of the electric motor (14), and wherein the range of the vehicle (10) is determined on the basis of the determined vehicle weight.
