Abstract (en)

[origin: WO2012079554A2] For an information carrier (1) for magnetically attaching to an object (8) to be marked, according to the invention the information carrier (1) is provided with a contact-breaking surface (4), which is connected to a contact surface (2) of the information carrier (1) at an angle, wherein the contact surface (2) enables the information carrier (1) to magnetically adhere to the object (8) to be marked. By tipping the information carrier (1) onto the contact-breaking surface (4) by means of a corresponding device, the information carrier (1) can be removed from the object (8) to be marked.
