Abstract (en)

[origin: WO2012080634A1] Connection device (1) designed to connect, particularly a ship in a port, comprising a connector (2), a carriage (3) forming a housing (17) for the connector when it is not connected, and a runway track (4) on which to move the carriage, said connector being designed to be connected by cable (30) to a land-based network. Such a device means that the correct positioning of the ship relative to the connector can be guaranteed.
