Abstract (en)

[origin: EP2653057A1] The hair styling device has two mold portions (1a,1b) for shaping the hair, where the mold portions connected by a hinge in a movable manner. Two hair treatment sections (2a,3a) are provided in the former mold portion for the treatment of hair. The former hair treatment section is arranged on a side facing the latter mold portion, while the latter hair treatment section is arranged on another side opposite to the latter mold portion. The latter mold portion has two hair treatment sections (2b,3b) for the treatment of hair. The latter hair treatment sections are formed as an extending recess.
