Abstract (en)
[origin: EP2653088A1] The dishwasher has a rinsing container providing a rinsing chamber and comprising a feed aperture that is lockable by a pivotably mounted rinsing chamber door. A reservoir for an intermediate storage of rinsing water is fluidically connected to the rinsing container. A filter (17) is inserted in the flow connection between the rinsing container and the reservoir. The filter has a filtering fabric (22) arranged in a cylindrical filter housing (21), and an annular scraper (29) co-acting with the filtering fabric, where the scraper displaceably guided in the filter housing.
