Abstract (en)  
A resin container includes a neck section 2 to which a cap can be detachably attached, a shoulder section 3 formed continuously from the neck section 2, a body section 4 formed continuously from the shoulder section 3, and a bottom section 5 formed continuously from the body section 4 and located at the lowermost portion. The container further includes, at the lower end portion of the body section 4, a bellows-like cushioning section 10 that is elastically deformable in the vertical direction.
