Abstract (en)
[origin: EP2653612A2] The skid segment (30) has a skid section (36), on which a mounting section is formed in a direct and indirect manner. The mounting section is formed as a plug-in projection (38). A stop surface (33) is provided, which extends transverse to the central longitudinal axis of the plug-in projection, where the central longitudinal axis specifies the plug-in direction. The plug-in projection has a latch, with which the plugging movement is limited. The plug-in projection has support flanks on opposite sides. An independent claim is included for an edge protector with plug-in receptacles.
