Abstract (en)

[origin: EP2653616A2] The element (1) has a plate-like base body (2) with a front side (3) and a back side, where the front side is limited by an edge. A positioning lath (6) is arranged along in sections, and stands out from a plane of the front side. The positioning lath comprises a recess (7) for a retainer and spatial alignment of Zierlatte made of timber. The positioning lath comprises holes (11) for connecting two structural elements made of metal. The recess is arranged along a side edge of the positioning lath.
