Abstract (en)

[origin: EP2653637A1] The lock has a head-piece (10), a boot (14) and a mechanical element, which is installed with adjustable connection between a casing and the head-piece. The mechanical element comprises adjustable connection on a pair of guide elements (28, 48) in translation for freely guiding a container with respect to the head-piece. The mechanical element is provided with a single threaded rod (36) that connects the head-piece and the boot so as to adjust the position of the boot with respect to the headrest by the single threaded rod.
