Abstract (en)

The valve has two flaps arranged in a suction passage and an exhaust gas passage, respectively. Two shafts hold the flaps, respectively. The suction- and gas passages open into a common collecting duct (7). A drive device drives the flaps and comprises control disks (17) that are located on the shafts in a torque-proof manner, and drive pinions that are rotatably arranged on the shafts. The disks and the pinions comprise drivers (22-25) that correspond to each other. The pinions engage with a common pinion, and the disks are pre-tensioned in a normal position by a spring element (31). The spring element is designed as a spring clip.

Abstract (de)

Ein Mischventil (6) einer Brennkraftmaschine (1) eines Kraftfahrzeuges hat eine Antriebseinrichtung (8) mit jeweils einem Antriebsritzel (18, 19) und einer Steuerscheibe (16, 17) zum Antrieb zweier Klappen (10, 11). Ein einziger Stellmotor (9) zum Antrieb der Antriebsritzel (18, 19) ist in einem Eckbereich eines Abgaskanals (5) und eines Ansaugkanals (4) angeordnet. Das Mischventil (6) gestaltet sich besonders kompakt.
