Abstract (en)

[origin: EP2653787A2] The covering device (1) has a main portion which partially covers a vertical housing opening (3) of a housing (4) of a desk fan device (10). A veneer element is coupled to the housing opening by using a sliding guide. A predetermined opening angle (8) is formed between a closing position and an opening position (1') of the main portion with respect to a pivotable vertical line (7). An independent claim is included for the desk fan device.
