Abstract (en)

[origin: EP2653815A1] The layer furnace system (S) has several heating portions (h1-h5) that are arranged on top of one another along vertical direction (V), and provided for receiving flat metal components. The furnace doors (1-5) are arranged along the vertical direction for opening and closing of several heating portions. The flat metal components are metal sheets. An outer frame is provided with vertical columns. An independent claim is included for method for operating layer furnace system.
