Abstract (en)

[origin: EP2653958A1] Provided is a mobile terminal device that includes a plurality of touch displays and a control unit. The control unit associatively controls screens displayed on the plurality of touch displays based on the number of simultaneous operations and operation directions. The number of simultaneous operations is the number of touch operations simultaneously carried out and accompanied by the movement of touch positions, and the operation directions are directions in which the touch positions of the touch operations have moved.
