Abstract (en)

[origin: WO2012083902A1] The invention relates to a multi-functional device for accommodating and providing a plurality of keys (27, 32) for key-lock locking systems, comprising a closable housing (5) having an internal key receptacle, at least one sorting means for contained keys being associated with the device. For this purpose, at least one key magazine of any type is provided, said key magazine having an operating element (4c) for selecting and pushing forward the keys (27, 32). The housing (5) of the key magazine can be connected to any application (24, 25, 25b, 33).
