Abstract (en)

[origin: WO2012084592A1] The invention relates to an opening and closing device for movable furniture parts, in particular drawers (3), comprising a pull-in device (40) and a push-out device (6), wherein the push-out device (6) has a carrier (26) pre-tensioned by an energy store (29) which can be locked in an end position of a guideway (22) and coupled to a carriage (15). The device further comprises an adjustable limiting element (23) in order to limit the path of the carrier (26) in the opening direction.
