Abstract (en)

[origin: WO2012084809A1] The invention relates to a fully automatic coffee maker, in particular for household purposes, for preparing a plurality of different coffee beverages, comprising a displaceable brewing chamber (10), which has an opening (38) to be filled with ground coffee (16), a displaceable T-piston (14) for ejecting the ground coffee (16) from the brewing chamber (10), and a movable wiper (48) for removing coffee residue formed of the ground coffee (16) from the T-piston (14), and further comprising a slot (20; 22), which during operation controls the movement of at least the T-piston (14). According to the invention, the slot has a first path (I, I') and a second path (II, II') at least in some sections.
