Abstract (en)

[origin: WO2012083934A1] The invention relates to a covering element for sealing a body part in a gas-tight manner, comprising a film element (1), which can be joined together around the body part (2) in a gas-tight manner, and comprising at least one sleeve body (13), which is designed as a prism with three lateral surfaces that adjoin one another at acute angles in the cross-section of the prism.
