Abstract (en)

[origin: WO2012084346A1] The invention relates to a transmission arrangement (100) for transferring a rotational movement in a power tool, in particular a hand-power tool (10), comprising a coupling unit (140) which is designed as an engagement coupling and which comprises at least two coupling members (152, 154) and a bevel transmission (108) that has a bevel gear pair (106). A gear (104) of the bevel gear pair (106) forms a coupling member (152) of the coupling unit (140).
