Abstract (en)
[origin: WO2012084351A1] The invention relates to a storage box (10, 10a, 10b, 10c) having a floor (16), and having two side walls (18) extending from the floor (16) and disposed parallel to each other, and having two end walls (20) extending from the floor (16) and disposed parallel to each other, wherein the side walls (18) and the end walls (20) are joined with a hinge to the floor (16) and can be folded into a position in which said walls are parallel to the floor (16), and having side clips (22) joined with a hinge to the side walls (18) at the edges thereof adjoining the end walls (20), a first side (24) of each contacting one of the end walls (20) and being releasably connected to said end wall by means of at least one first pushbutton (34). According to the invention, at least one of the end walls (20) supports an end clip (26) joined with a hinge to said wall at an edge thereof running spaced apart from the floor (16), said clip contacting the side clips (22) connected to the end wall (20) at the second side (30) of each facing away from the first side (24) thereof, and releasably connected to said side clips by means of at least one second pushbutton (36).
