Abstract (en)

[origin: WO2012085239A1] The invention relates to a method for preparing a composition including synthetic inorganic particles, consisting of: preparing a hydrogel that is a precursor of said synthetic inorganic particles; and subjecting said hydrogel to a hydrothermal treatment, characterised in that at least one step of said hydrothermal treatment is carried out by adding at least one carboxylate salt to the treatment medium, said carboxylate salt having the formula R-COOM', where M' denotes a metal selected from the group consisting of Na and K, and R is selected from H and the alkyl groupings that include fewer than 10 carbon atoms.
